

Community Preservation Act Fiscal Year 2023

Article 22: Summary/Description

The Historical Commission seeks funding for rehabilitation and restoration of the Town owned Bullard House. Structural issues (i.e. foundation, drainage, floor underlayment and support) identified from building surveys require professional architectural services, including associated engineering and design services. Additionally, architectural services are integral to the submission of a Massachusetts Historical Commission (MHC) grant application.

The CPA funds approved last November, as well as funds requested under this article, will be used to leverage our application for an MHC matching grant.

Only Community Preservation Act funds reserved for Historic Resources are sought in this warrant article.
